

TO WHOM IT MAY CONCERN

Mike Landay has been translating for Amanda Conrad Translations Ltd since June 2006 and has supplied us with a total of 37 patent translations from Japanese to English in that time.

The specific technical areas involved have included:

optical modulators; safety caps for containers; friction stir welding; plasma display panels; hinges; power tools; foaming preparations; position detectors; fingerprint-based ID verification; cell phones; gas turbine combustion cylinders; holographic recording; angular velocity detection; internal combustion engines; milling tools; electrolytic finishing; industrial robots; laser processing; control rod technology; wafer cutting machines; grinding machines; image generating systems; pipe expanders; touch-sensitive coordinate detection.

We have always found Mike Landay to be totally professional in his approach to the work we send him. He meets all of our deadlines including on urgent assignments and his translations are of a high quality.

We would not hesitate to recommend him for the translation of patents from Japanese to English.
